

## CERTIFICATE OF ANALYSIS

Submitted: John Smith	Work Order: 20HOM123
	Date Received: May 13, 2020
	Date Analyzed: May 21, 2020
	Date Reported: May 21, 2020
	Analysis: Bulk Asbestos
Client's reference: -	Reference Procedure: PLM Dispersion Staining, EPA 600/R-93/116. 400-Point count

### Results:

Client Sample Description	Laboratory Sample #	Asbestos Content %
1. Tile, "Wood" color	20HOM123-01	2% Chrysotile
2. Tile "Pale" color	20HOM123-02	<RL

### Note:

- Reporting Limit (RL) = 0.5% by weight. RL is the lowest concentration of asbestos that can be detected and quantified by our laboratory; If your result shows "<RL", then asbestos in the sample was either not detected or present at low concentration below the quantifiable limit.
- Sample(s) was (were) packed according to the standard method recommendations and accepted for analysis.
- Test results pertain only to analysis of samples herein reported.
